2-556 WATER TEMPERATURE SENSOR G1/4" THREAD SMART PORT 10M

DESCRIPTION

A sensor that is used to measure water temperature or Delta T in a water cooler setup. Can be used on Dimlux smartport devices.

In a water cooler setup using a smartbox in fan/pump control 2 sensors determen water temperature and dT between water-in and water-out. The water temperature sensors are used to determen pumpspeed and fan speed.

SPECIFICATIONS

HIGH ACCURACY

Temperature range: -40~105°C
Accuracy: ± 0,2°C @25°C
Smartport: Smart Box / MKII / LED
Cable length: 10 meter / 32,8 feet
