

2-555 WATER TEMPERATURE SENSOR G1/4" THREAD SMART PORT 5M

DESCRIPTION

A sensor that is used to measure water temperature or Delta T in a water cooler setup. Can be used on Dimlux smartport devices.

In a water cooler setup using a smartbox in fan/pump control 2 sensors determine water temperature and dT between water-in and water-out. The water temperature sensors are used to determine pumpspeed and fan speed.

SPECIFICATIONS

HIGH ACCURACY

Temperature range: -40~105°C

Accuracy: $\pm 0,2^{\circ}\text{C}$ @25°C

Smartport: Smart Box / MKII / LED

Cable length: 5 meter / 16,4 feet
